 Google Scholar

Education

Federal University of Technology – Paraná (UTFPR)

Jul 2021 – Dec 2026

Bachelor of Computer Engineering – Toledo, PR, Brazil

GPA: 3.41 (84/100)

Research Experience

International Research Intern, Université Laval – Québec City, QC, Canada

May 2026 – Present

Second MITACS Globalink Research Award. Supervised by Prof. Chengkai Fan.

- Applying machine learning algorithms to sustainable mining engineering problems.

International Research Intern, Institut National de la Recherche

Dec 2024 – Mar 2025

Scientifique – Montréal, QC, Canada

First MITACS Globalink Research Award. Supervised by Prof. Leszek Szczecinski; co-supervised by Prof. Ismail Ben Ayed.

- Created CLIP-LoRA-XS, achieving comparable accuracy to CLIP-LoRA with 50% fewer trainable parameters. Repository: https://github.com/EduPras/CLIP-LoRA_XS
- Conducted a systematic literature review on fine-tuning strategies for Vision-Language Models.
- Developed a KinectV2 URDF module for ROS2/Gazebo simulation. Repository: https://github.com/EduPras/kinect_v2_ros2

Capstone Project, UTFPR – Toledo, PR, Brazil

2025

Supervised by Prof. Daniel Cavalcanti.

- Applied NASA/IBM's Prithvi-EO-2.0 Geospatial Foundation Model to segment endangered *araucaria angustifolia* canopy from satellite imagery, achieving segmentation and identified unlabeled trees with only 30 annotated images.

Undergraduate Research Fellow, UTFPR – Toledo, PR, Brazil

Mar 2022 – Mar 2024

Funded by the Araucária Foundation Scientific Initiation Scholarship.

- Built a containerized deployment of the Sentilo IoT platform for low-cost air quality monitoring, reducing configuration boilerplate and deployment time. Repository: <https://github.com/EduPras/sentilo-docker>
- The same infrastructure was later stress-tested, resulting in a published paper at WPerformance 2025.

E. de; CAMARGO, Edson, "Scalability Evaluation of the Sentilo Platform Running on Containerized Resources," in *Anais do XXIV Workshop em Desempenho de Sistemas Computacionais e de Comunicação (WPerformance 2025)*, SBC, 2025. doi: 10.5753/wperformance.2025.245001

Awards and Scholarships

Mitacs: Mitacs Globalink Research Award (Université Laval)	2026
Mitacs & Araucária Foundation: Mitacs Globalink Research Award (INRS)	2024–2025
ICPC Brazil: 53rd Place, Brazilian Finals	2023
Araucária Foundation: Scientific Initiation Scholarship	2022–2023
OBMEP (Brazilian Mathematics Olympiad): Bronze Medal	2018

Professional Experience

Machine Learning Engineer, CEIA-UFG LAMIA – Remote	Jun 2024 – Present
• Deploying a Knowledge Tracing system (SINKT) using Transductive Graph Learning to predict student answers. • Building AI agents for processing study materials with LangChain, LangGraph, and RabbitMQ.	
Data Analyst, EEMovel – Cascavel, PR, Brazil	Jun 2020 – Dec 2021
• Developed REST APIs (Django) and maintained databases (Elasticsearch, PostgreSQL, MongoDB). • Built web data extraction pipelines and assisted with Azure infrastructure.	

Skills

Machine Learning & Deep Learning: PyTorch, TensorFlow, Scikit-learn, CNNs, UNet, YOLO, SAM, Vision-Language Models, LoRA.

LLMs & AI Agents: LangChain, LangGraph, LangSmith, RAG, Prompt Engineering.

Infrastructure & Cloud: AWS (Lambda, API Gateway, Step Functions), Docker, Kubernetes, Terraform, GitLab CI/CD.

Data & Databases: PostgreSQL, Redis, MongoDB, Neo4j, Elasticsearch, Apache Airflow.

Programming: Python, C, C++, Java.

Monitoring: Prometheus, Grafana.

Languages

Portuguese: Native		English: Advanced		French: Basic		Mandarin: Basic
